

CENTRA

Medical Education
& Student Affairs

Spring 2025

Dear STEM Students and Parents,

My name is Darryl Lee and I am the Centra Intern Specialist for the STEM Academy. I am excited to have the opportunity to partner with the STEM Academy seniors for their internships. The staff and physicians at CENTRA are eager to mentor the STEM Academy students as they explore the different health professions through observation opportunities in various departments.

Parents please complete the attached documents with your son or daughter in blue or black ink and *return to Ms. Susan Cash in a timely manner*. **You will also need to provide a copy of a Negative TB skin test, as well as proof of having received the current flu vaccine for 2024-2025 flu season.** Students who do not fulfill these requirements *will not be allowed to participate* in the CENTRA observational experience. Please note that STEM will be partnering with CENTRA at the height of flu season. For this reason, dependent on regional health conditions and recommendations provided by the Center for Disease Control and the Virginia Department of Health, the rotation schedule may be altered to comply with hospital mandates.

If you have any questions, please do not hesitate to contact me. I am looking forward to meeting each of you and partnering with the STEM to provide an exemplary education in science and technology through the exploration of health-related professions.

Sincerely,
Darryl Lee
